STG - (A) United States patent
AB - The sole comprises three layers, including (a) an outer or ground
contact sole (7) having flexibility, ground-gripping, and
abrasion-resistance properties, (b) an upper or comfort layer (8)
positioned directly beneath the foot and having elastic
shock-absorption properties, and (c) an intermediate layer or rib
(9) positioned directly between the upper portion of the contact
layer (7) and the lower portion of the comfort layer (8) and
having torsional rigidity properties which provide both for the
distribution of shocks sensed by the contact layer (7) and for
their diffusion over the comfort layer (8) before they come into
contact with the foot (4).
